React, Node.js, Express, MongoDB, Redis, OAuth 2.0

- Implemented secure session-based authentication with Google One Tap and GitHub OAuth integration.
- Designed multi-device login/logout with session invalidation.
- Built hierarchical folder structure with file metadata handling.
- Developed file operations: upload, rename, soft delete (recycle bin system).
- Integrated Redis caching layer to optimize frequent read operations.
- Built real-time notification system using WebSockets.
- Currently integrating AWS S3 for persistent file storage and deployment.

Crowdfunding Platform using Blockchain | React, Solidity

[github.com/name/repo](#) 🔗

- Built a modern and responsive crowdfunding platform enabling users to create, browse, and fund campaigns.
- Integrated Web3 functionalities using Thirdweb SDK to connect with smart contracts and manage decentralized donations.
- Implemented tier-based rewards, dynamic campaign statuses (*Active, Fulfilled, Expired*), and media uploads via IPFS for campaign assets.
